Inspection & Technical Services

2026

SAFEGUARDING AIRCRAFT & ASSETS

Every aircraft lifecycle event carries financial, technical, and operational exposure. From inspections and valuations to maintenance and daily operations, unmanaged complexity and fragmented oversight can lead to costly surprises. Independent technical guidance and end-to-end supervision are essential to protecting asset value and operational continuity.

OUR BACKGROUND & SKILLS

Our background is built on decades of hands-on involvement across aircraft maintenance, inspection, valuation, and regulatory oversight. This experience allows us to move beyond checklist compliance and apply informed technical judgment – the kind that protects asset value and avoids costly surprises.

- 30+ years of hands-on experience in aviation maintenance and inspection, having worked on a variety of aircraft types
- Deep understanding of aircraft systems from background as Certified Aircraft Engineers, Quality Assurance Managers, Aircraft Inspectors
- Up-to-date with the latest regulatory requirements and industry standards through continuous training
- ISTAT Certified senior appraisers that provide bespoke portfolio analysis, and valuation analytics

AIRCRAFT TYPES

Airbus	Bombardier
Boeing	Gulfstream
COMAC	Dassault
Irkut (UAC)	Honda
Embraer	Leonardo
ATR	Bell
LET	Sikorsky
Mitsubishi	Robinson
De Havilland Canada	Airbus Helicopters

AVIATION AUTHORITIES

GACA	EASA
CASA	FAA
CAAS	Transport Canada
DGCA	UK CAA
National CAAs	GCAA
ANAC/AFAC/UAEAC	

OUR APPROACH

1. Quality First

Deliver services through structured processes, standardized methods, and attention to detail to ensure reliable outcomes.

2. Technical Excellence

Apply industry expertise and practical knowledge to provide informed guidance and sound technical judgment.

3. Compliance & Risk Management

Maintain alignment with regulatory requirements and proactively identify and mitigate potential risks.

4. Transparent Delivery

Provide clear communication, progress tracking, and actionable outputs at every stage of the project.

OUR SERVICES

INSPECTION & TECHNICAL SERVICES

Independent technical assessment and operational oversight. Supporting informed technical and commercial decisions through independent aircraft assessment and operational expertise.

- | | |
|--|--|
| • Aircraft Physical Inspections | • Pre-Purchase Inspections (PPI) |
| • Mid-Lease & End-of-Lease Inspections | • Delivery & Redelivery Inspections |
| • Aircraft Technical Records Review | • Engineering & Technical Support |
| • Technical Project Management | • Borescope Inspection Solutions |
| • Technical Reporting & Due Diligence | • Aircraft Appraisal & Asset Condition Surveys |
| • MRO Oversight & Technical Representation | |

ENTRY INTO SERVICE & AIRCRAFT TRANSITION

Transition management from acquisition to operational deployment. Delivering seamless aircraft transitions with practical operational coordination and technical oversight.

- | | |
|---|--|
| • Entry Into Service (EIS) Planning | • OEM & Authority Coordination |
| • Aircraft Registration / Re-registration | • AOC Support Solutions |
| • Maintenance & Livery Coordination | • AMP Development Support |
| • Storage & Preservation Oversight | • Aircraft Return To Service |
| • Initial Provisioning & Spare Solutions | • Logistics & Freight Coordination |
| • Simulator & Type Training Facilitation | • Operational Readiness Support |
| • Certified EASA / FAA Technical Staff Deployment | • Crew & Maintenance Staff Training Coordination |

CAMO & CONTINUING AIRWORTHINESS

Compliance, airworthiness, and technical control. Maintaining regulatory compliance and technical integrity throughout the aircraft lifecycle.

- | | |
|--|--------------------------------------|
| • CAMO & Transition CAMO Support | • Airworthiness Reviews |
| • ARC Recommendations & Follow-up | • AMP Development & Control |
| • MCC & Maintenance Planning Support | • AD & SB Compliance Monitoring |
| • Authority Coordination Support | • Technical Records Management |
| • Reliability & Configuration Monitoring | • Continuing Airworthiness Oversight |

FLIGHT OPERATIONS SUPPORT

Operational deployment and flight coordination solutions. Supporting safe and efficient aircraft operations during transition and deployment phases.

- | | |
|--|------------------------------------|
| • Ferry Flight coordination | • Demo/Test Flight Support |
| • Secure Flight Permit coordination | • Flight Crew Coordination |
| • Route & Operational Planning | • Flight Watch Support |
| • Handling & Airport Coordination | • Ground Operations Coordination |
| • Fuel & Operational Support Solutions | • Aircraft Delivery Flight Support |

ASSET SUPPORT & ADVISORY

Strategic technical advisory for owners, operators, and lessors. Combining operational expertise and technical insight to support long-term asset value and informed commercial decisions.

- | | |
|--|--------------------------------------|
| • Aircraft Transition Strategy | • Lease Return Planning |
| • Technical Asset Advisory | • Maintenance Exposure Analysis |
| • Aircraft Remarketing Support | • Technical Risk Assessment |
| • Technical Negotiation Support | • Maintenance Reserve Review |
| • Project Management & Coordination | • End-of-Life / Teardown Advisory |
| • Asset Condition & Value Preservation | • Technical Claims & Dispute Support |
